Packaging Division

Present on the Italian and international market since **1973**, Sorma specialises in the production of machinery and automated lines for weighing and packaging fruits and vegetables.

Supported and assisted by **Netpack** since **1984** with the production of packaging, it is able to satisfy even the most demanding customers with extreme competence and professionalism.

Designing machinery and lines as well as customised packaging has been our mission for over fifty years, always guaranteeing assistance, maintenance and high quality services.

About us

We are on the Italian and international markets with several production sites in **Italy, Spain, the United States and Turkey**, each specialising in the manufacture of specific products and machinery.

We can consider ourselves the only group in the world able to realise the entire production cycle within our almost 100,000 sqm of warehouses.

The group has an entrepreneurial model with an enterprising vertical structure in both **material and machinery production**.

Our values

Controlling the entire material production chain allows us to guarantee quality at every stage, which for us translates into **innovative and highly reliable solutions** in compliance with of all applicable standards:

High quality printing

Modern and eye-catching designs

Customisation

Tough and durable packaging

Technical support

Our bags

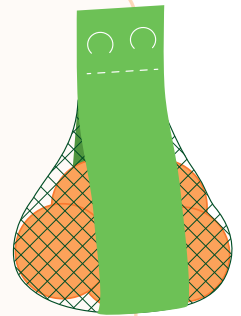

Vertbag

- Pre-assembled roll
- Resistant up to 5kg
- StandUP
- Premium packaging
- Bands available:
430, 560, 630, 700 mm

(A) (D)

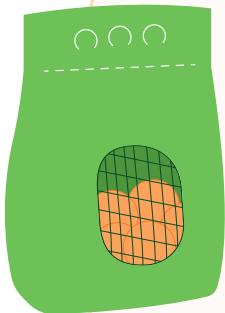

Sormapack

- Versatile
- Bands separated from the net
- Premium packaging
- Resistant up to 3kg
- Band width:
74, 88, 106 mm

(A) (B) (C)

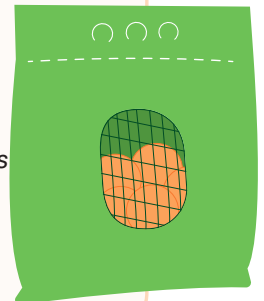

StandUp

- Separate or preassembled rolls
- Paper with net or cellulose film window
- Ideal for non washed produce
- Reduced visibility of the contents
- Resistant up to 2kg

(D)

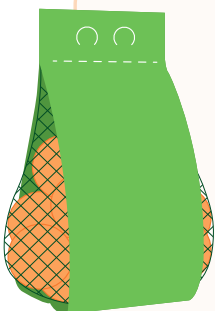

Pillow

- Separate or preassembled rolls
- Paper with net or cellulose film window
- Ideal for non washed produce
- Reduced visibility of the contents
- Resistant up to 2 kg

(D)

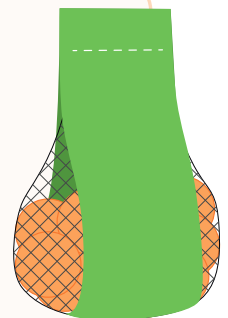

Dpack

- Attractive
- Resistant up to 5kg
- StandUP
- Premium packaging
- Band width:
74, 88, 106, 118, 130, 144 mm

(A)

Sormavertbag

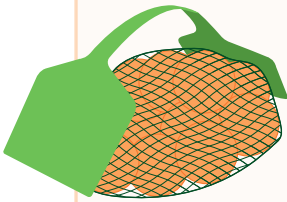

- Attractive
- Resistant up to 5kg
- StandUP
- Premium packaging
- Band width:
98, 106, 118, 130, 144 mm

Our bags

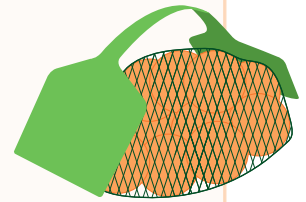

Sormabag woven net

- Light pack
- Cheap
- Practical customisable handle
- Resistant up to 2kg

(B)

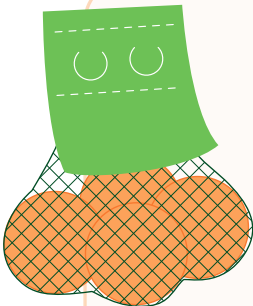

Sormabag extruded net

- Premium packaging
- Practical customisable handle
- Resistant up to 2kg

(D)

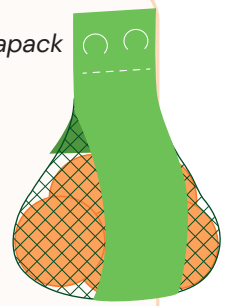

Sormapack economic

- Economical
- Light pack
- Resistant up to 2kg
- Entry price pack
- Band width: 88 e 106 mm

(A) (B) (C)

Sormapack Eco plus

- Hybrid version between Sormapack and Sormapack Economic
- Economical
- Up to 2kg
- Light pack
- Band width: 74, 88, 106 mm

(A) (B) (C)

Sormapack fruits in line

- Ideal for garlic and onions
- 3 heads in line
- Customisable bands
- The net holds the product together and prevents it from opening or defoliating
- Band width: 50 mm

(C)

Our packing machines

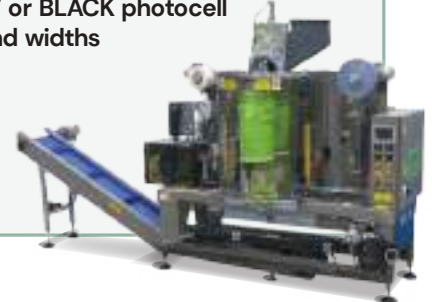

CBR-170

- Versatile and Delicate
- Bands with UV or BLACK photocell
- Numerous band widths
- Extruded and woven nets
- Paper, Peel, Plastic

① ② ⑥ ⑨ ⑩

BRS-134

- Versatile and Economical
- Attractive and lightweight contoured handle
- Bands with UV or BLACK photocell
- Numerous band widths
- Woven net
- Peel, Plastic

② ⑦

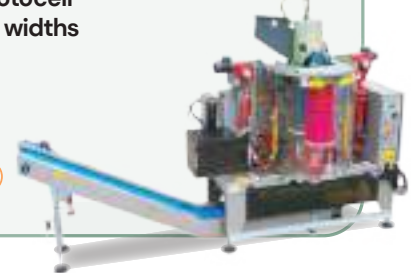

SBU-134

- Resistant and Performing—Bands with UV or BLACK photocell
- Numerous vertical tube widths available
- Extruded net, paper film or flowpack
- Paper, Peel, Plastic

① ③ ④ ⑤

BRT-134

- Simple and economical
- In line fruit version —Bands with UV or BLACK photocell
- Numerous band widths
- Woven net
- Peel, Plastic

Net bags

Sormäpaper

The Sormapaper line is distinguished by the use of cellulose nets that allow the products to breathe and customers to see the contents of the bags.

Net bags

Sorma^{compostable}

The end of life of some materials is enhanced if they are collected and disposed of with organic waste. However, this happens only with compostable nets, where the cellulose net, certified according to EN13432, can be disposed of it in the organic waste.

Net bags

Sormapeel

Sormapeel has a band which is made of FSC paper and mono polymer plastic and is very easy to separate. The separation of the two materials has allowed us to replace over 40% of plastic with paper, compared to standard packaging. It also makes it possible for both materials to be completely recycled.

Net bags

Sorma^{mono-polymer}

Sorma Group has invested heavily in R&D to increase the recyclability of its packaging. The result is the first fully recyclable mono polymer packaging line. Our bags are made of 100% polyethylene or polypropylene so as to guarantee that waste that can be completely and easily recycled by recyclers.

Go to website

Net bags

Sormä performing

Technological, chemical and physical development has given us the opportunity to combine the characteristics of different polymers, with a rocketing technical potential. The aim of the performing line is to create the perfect combination that ensures our customers the best result in terms of both productivity and aesthetic quality.

Net bags

Customisable band

Raschel bags have always been the most widely used net bags for large formats of 5, 10, 20 kg. We can customise the bags by applying a printed band, and by automating the filling and sealing phase performed by our packaging machines. (we don't provide raschel nets)

Film & Flowpack

Poly Bag

Born out of the need to store and transport apples, carrots and cherries, Poly Bags are – par excellence – the bags that best preserve the organoleptic features of such produce. The macroperforated polyethylene film, available in various thicknesses, heights and widths, is fully recyclable, can be printed with high photographic resolution.

Film & Flowpack

Polypropylene flowpack

Flowpack is available in various thicknesses, heights and widths, and is the ideal material for such produce. Different versions are available: multi or single film, antifog, macroperforated or microperforated. It comes in customised rolls with 10 colour flexographic printing.

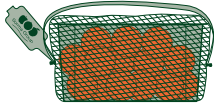

Film & Flowpack

Polyethylene film

Printed vertbag or pillow, made of coextruded or laminated mono polymer films, protects the produce from light while keeping soil and dust inside.

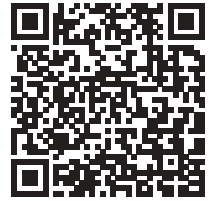

Punnets

Sormapaper

Depending on the requirements of the product, we can offer different plastic-free packs offering more or less visibility of the contents.
(we do not provide punnets)

Vai al sito

Punnets

Sormacompostable

The end of life of some materials is enhanced if they are collected and disposed of with organic waste. However, this happens only with compostable net punnets, where the cellulose net, certified according to EN13432, can be disposed of in the organic waste.

Punnets

Mono Polymer

Our punnets are made of 100% polyethylene or polypropylene so as to guarantee waste that can be completely and easily recycled by recyclers.

Punnets

Performing

The aim of the performing punnet line is to create the perfect combination that ensures our customers the best result in terms of both productivity and aesthetic quality.

Punnets

Thermosealed

The film for thermosealed punnets can be customised with flexographic printing in up to 10 colours and is available in the peelable, antifog and macroperforated versions.

Boxes

Net covers and labels

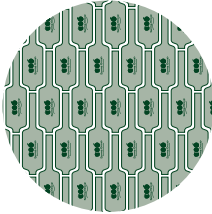

Our net covers protect the contents from tampering at the point of sale, and make the fruit more colourful and attractive, too. They consist of a pre-assembled roll composed of film and customisable net.

Go to website

Traceability and customisation require the use of neutral or preprinted labels. Preprinted cardboard customises hard boxes and folding crates. Different formats are available.

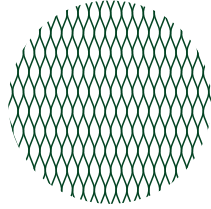

Labels

Wine glass labels, Clip to clip, adhesive and Manual sticker

We complete the range of printed nets and bands with customised or neutral labels. Over the years, we have invested in flexographic printing technology to improve the colour of our labels. We use only the best high definition UV inks and the best media available on the market

Nets

Cellulose, extrud, woven

Netpack's nets are precisely designed with high quality materials and guarantee a natural exchange between ethylene and oxygen, maintaining the freshness of the product and extending its life.

Industrial packaging

Material for the processing industry

The combination of the best flexo printers, the use of Kodak Flexcel NX engraving technology and the vast experience of our technicians guarantees all our customers optimal print quality, comparable to gravure solutions.
